

Heather Konish

Lighting Designer - Visualizer - Scenic Designer

Employment History

Architectural Lighting Designer, MRD.

June 2019-Present

Lighting Design: Sphere, the latest 4500 passenger prototype ship by Princess Cruise Lines set to sail in 2023. Sphere merges the ocean environment with Princess's California roots and modern technology to create a unique cruise experience. The lighting design is a major unifying factor creating a cohesive fusion between seven world renowned architects and interior designers.

- Lead designer for 7 restaurants, Crooner's Jazz Club, Arena Theater, Princess Live, Kids Center, Teens and Tweens Center, and Crew Amenity Areas.
- Part of the team responsible for lighting design of all public spaces, passenger cabins, and ship exterior
- Major project management role including internal resource management, budgeting, control system tracking, and coordination with architects, shipyard, and owner
- CAD documentation and master specification writer including the development of custom built specification database software
- AGi32 lighting calculations and 3D rendering

Assistant Lighting Design: APEX and BEYOND, the latest additions to Celebrity Cruise's newest class of ships. Scheduled to sail in 2021 & 2022 respectively, the ships represent a major step forward in lighting technology while blending marine architecture and lighting.

- Part of the team responsible for lighting design of all public spaces, passenger cabins, and ship exterior
- Assisted in project management and coordination with architects and the shipyard (remote and on-site)
- CAD documentation and specification writing
- AGi32 lighting calculations
- Lead on-site focus and programming teams
